DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with N. Alexander Nolte on 07/13/2006.

The application has been amended as follows:

Claim 1: (Currently Amended) A method for managing congestion in a network switch, said method comprising the steps of:

receiving an incoming packet on a first port of a network switch for transmission to a destination port, wherein said network switch is one of a plurality of network switches configured in a stack;

determining if said destination port is a monitored port;

determining a queue status of said destination port, if said destination port is determined to be a monitored port; and

prescheduling transmission of said incoming packet to said destination port if said destination port is determined to be a monitored port;

wherein the step of prescheduling transmission comprises dropping said incoming data packet only when the queue status of the destination port indicates that a queue for the destination port is full, and

wherein the network switches in the stack are connected through high performance interconnect links and the method further comprises stripping a module header from packets received via the high performance interconnect links, wherein the module header includes at least one of a field that identifies a trunk group identifier of the first port or bitmap that sends a packet to a mirror-to port located on a remote module.

Allowable Subject Matter

Claims 1-2, 5 and 3 have been renumbered as 1-4 respectively.

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

Schwartz et al, US Patent No. 6,434,115 B1, discloses a system and method for switching packets in a network. Schwartz does not teach or fairly suggest a header includes at least one of a field that identifies a trunk group identifier of the first port or bitmap that sends a packet to a mirror-to port located on a remote module as recited in claim 1.

Claims 2-3 are allowed because they depend on allowed claim 1.

Claim 4 is allowed for reasons given in the previous action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thai D. Hoang whose telephone number is (571) 272-3184. The examiner can normally be reached on Monday-Friday 10:00am-6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on (571) 272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
